

第1世代の回転水槽実験関連論文リスト（欧米）

無印：実験

：レビュー

：理論

：数値実験

：軸対称の流れに関する研究

：二層モデル

：歴史的文献（最初の回転水槽実験）

Barcilon, V., 1964: Role of the Ekman layers on the stability of the symmetric regime obtained in a rotating annulus., J. Atmos. Sci., 21, 291-299.

Bowden, M., and H.F. Eden, 1965: Thermal convection in a rotating fluid annulus: Temperature, heat flow and flow field observations in the upper symmetric regime. J. Atmos. Sci., 22, 185-195

Buzyna, G., R. Kung, W.W. Fowles and R.L. Pfeffer, 1974: Measurement of time dependent heat flux in the interior of a rotating, differentially-heated fluid. AIChE Sym. Ser., 70, 17-22

Buzyna, G., R.L. Pfeffer and R. Kung, 1978: Cyclic variations of the imposed temperature contrast in a thermally driven rotating annulus of fluid. J. Atmos. Sci., 35, 859-881

Buzyna, G., R.L. Pfeffer and R. Kung, 1984: Transition to geostrophic turbulence in a rotating differentially heated annulus of fluid. J. Fluid Mech., 145, 377-403.

Cent, P.R., and H. Leach, 1976: Baroclinic instability in an eccentric annulus. J. Fluid Mech., 77, 769-788

Douglas, H.A., R. Hide and P.J. Mason, 1972: An investigation of the structure of baroclinic waves using three-level streak photography. Quart. J. Roy. Meteor. Soc., 98, 247-263

Douglas, H.A. and P.J. Mason, 1972: Thermal convection in a large rotating fluid annulus: Some effects of Varying the aspect ratio. *J. Atmos.Sci.*, 30,1124-1135.

Fein, J.S., 1973: An experimental study of the effects of the upper boundary condition on the thermal convection in a rotating, differentially heated cylindrical annulus of water. *Geophys. Fluid Dyn.*, 5, 213-248.

Fowlis, W.W. and R. Hide, 1965: Thermal convection in a rotating annulus of liquid: Effect of viscosity on the transition between axi-symmetric and non-axi-symmetric flow regimes. *J. Atmos. Sci.*, 22, 541-558/

Fowlis W.W. and R.L.Pfeffer, 1969: Characteristics of amplitude vacillation in a rotating, differentially heated fluid determined by a multi-probe technique. *J.Atmos. Sci.*, 26, 100-108.

Fulz,D., 1952: On the possibility of experimental models of the polar-frontal wave. *J. Meteor.* 9, 379-384

Fultz, D., R.R.Long, G.V.Owen, W. Bohan, R.Kaylor and J.Weil, 1959: Studies of thermal convection in a rotating cylinder with some implications for large-scale atmospheric motions. *Meteor. Mongr.* , Boston, Amer. Meteo. Soc., 4, No.21, 1-104.

Green, J.S.A., 1960: A problem in baroclinic stability. *Quart. J. Roy. Meteor.Soc.*, 86, 237-251.

Hart, J.E., 1972: A laboratory study of baroclinic instability. *Geophys.Fluid Dynamics*, 3, 181-209.

Hart, J.E., 1973: On the behavior of large-amplitude baroclinic waves.*J.Atmos.Sci.*, 30,1017-1032

Hart, J.E., 1976: The modulation of an unstable baroclinic wave field, *J.Atmos.Sci.*,

33,1874-1889.

Hide, R., 1958: An experimental study of thermal convection in a rotating fluid. *Phil. Trans. Roy. Soc., London*, A250. 441-478.

Hide, R. and P.J. Mason, 1970: Baroclinic waves in a rotating fluid subject to internal heating. *Trans. Roy. Soc., London*, A268, 201-232.

Hide, R., P.J. Mason and R.A. Plumb, 1977: Thermal convection in a rotating fluid subject to a horizontal temperature gradient: Spatial and temporal characteristics of fully developed baroclinic waves. *J. Atmos. Sci.*, 34, 930-949

Hignett, P., A. Ibbetson and P. Killworth, 1981: On rotating thermal convection driven by non-uniform heating from below. *J. Fluid Mech.*, 109, 161-187.

Hild, R., 1953: Some experiment on thermal convection in a rotating liquid. *Quart. J. Roy. Meteor. Soc.*, 79, 161

Hild, R. and P.J. Mason, 1970: Baroclinic waves in a rotating fluid subject to internal heating. *Phil. Trans.*, A268, 201-232.

Hild, R. and P.J. Mason, 1975: Sloping convection in a rotating fluid. *Adv. Phys.*, 24, 47-100.

Hild, R., P.J. Mason, and R.A. Plumb, 1977: Thermal convection in a rotating fluid subject to a horizontal temperature gradient: Spatial and temporal characteristics of fully developed baroclinic waves. *J. Atmos. Sci.*, 34, 930-950.

Hignett, P., A.A. White, R.D. Carter, W.D.N. Jackson and R.M. Small, 1985: A comparison of laboratory measurements and numerical simulations of baroclinic wave flows in a rotating cylindrical annulus. *Quart. J. Roy. Meteor. Soc.* 111, 131-154.

Hunter, C., 1967: The axis-symmetric flow in a rotating annulus due to a horizontally applied temperature gradient. *J. Fluid Mech.*, 27, 753-778.

James, I.N., P.R. Jones and L. Farnell, 1981: A combined laboratory and numerical study of fully developed, steady, baroclinic waves in a cylindrical annulus. *Quart. J. Roy. Meteor. Soc.*, 107, 51-78.

Kaiser, J.A.C., 1969: Rotating deep annulus convection I: Thermal properties of the upper symmetric regime. *Tellus*, 21, 789-805.

Kaiser, J.A.C., 1970: Rotating deep annulus convection part 2. Wave instabilities, vertical stratification and associated theories. *Tellus*, 22, 275-287.

Kaiser, J.A.C., 1971: Heat transfer and thermal boundary layers in high amplitude annulus waves. *Geophys.Fluid Dyn.*, 4, 357-379.

Ketchum., C.B., 1972: An experimental study of baroclinic annulus waves at large Taylor number. *J.Atoms.Sci.*, 29, 665-679.

Koschmieder, E.L., 1968: Convection on a nonuniformly heated, rotating plane. *J. Fluid Mech.*, 33, 515

Lorenz,E.N., 1962: Simplified dynamic equations applied to the rotating-basin experiments. *J.Atmos.Sci.*, 39-51.

Mason, P.J., 1975: Baroclinic waves in a container with sloping end walls. *Phil. Trans.Roy. Soc.*, A278, 397-445.

McIntyre, M.E., 1968: The axi-symmetric convective regime for a rigidly bounded rotating annulus. *J. Fluid Mech.*, 32, 625-655.

Miller, T. and N.D. Reynolds, 1991: A study of baroclinic instability in a cylindrical annulus with the temperature gradient imposed on the lower surface. *J. Fluid Mech.*, 233, 495-518.

Pfeffer, R.L., G.Buzyna and W.W. Fowlis, 1974: Synoptic features and energetics of wave amplitude vacillation in a rotating , differentially-heated fluid. *J.Atmos.Sci.*, 31, 622-645.

Pfeffer, R.L., G.Buzyna and R. Kung, 1980a: Time dependent modes of behavior of thermally driven rotating fluids. *J.Atmos.Sci.*, 37, 2129-2149.

Pfeffer, R.L., G.Buzyna and R. Kung, 1980b: Relationships among eddy fluxes of heat , eddy temperature variances and baasic-state temperature paameters in thermally driven rotating fluids. *J.Atmos.Sci.*, 37, 2577-2599.

Pfeffer, R.L. and W.W. Fowlis, 1968: Wave dispersion in a rotating, differentially heated cylindrical annulus of fluid. *J.Atmos.Sci.*,25, 361-371.

Pfeffer, R.L.,W.W. Fowlis, J.Fein and J.Buckley, 1970: Experimental determination of the transition between the symmetrical and wave regimes in a rotating differentially heated annulus of fluid, *Pure Appl. Geophy.*, 81. 263-271.

Pfeffer, R.L. and Y.Chiang 1967: Two kinds of vacillation in rotating laboratory experiments. *Mon.Wea.Rev.*, 95, 75-82.

Rao, S.T. and C.B. Ketchum, 1975: Spectral characteristics of the baroclinic annulus waves. *J. Atmos. Sci.*, 32, 698-711.

Read, P.L. and R.Hide, 1983: Long-lived eddies in the laboratory and in the amtospheres of Jupiter and Saturn, *Nature*, 302, 126-129.

Read, P.L. and R.Hide, 1984: An isolateed baroclinic eddy as a laboratory analogue of the Great Red Spot on Jupiter. *Nature*, 308, 45-48.

Riel, H. and D.Fultz, 1957: Jet stream and long waves in a steady rotating-dishpan experiment: Structure of the circulation. *Quart. J.Roy.Meteor. Soc.*, 83, 215-231.

Riel, H. and D.Fultz, 1958: The general circulation in a steady rotating-dishpan experiment. *Quart. J.Roy.Meteor. Soc.*, 83, 215-231.

Robinson, A.R., 1959: The symmetric state of a rotating fluid differentially heated in the horizontal. *J.Fluid Mech.*, 5, 599-620

Saunders, P.M., 1973: The instability of a baroclinic vortex. *J.Phys.Oceanography*, 3, 61-64.

Stone,P.H.,1969: Preliminary presults of experiments with symmetric baroclinic instability. *J.Atmos. Sci.*, 26, 991-996

Spence, T.W. and D.Fultz, 1977: Experiments on wave-transition spectra and vacillation in an open rotating cylinder. *J. Atmos. Sci.*, 34, 2161-2185

Williams, G.P., 1967a: Thermal convection in a rotating fluid annulus: Part 1. The basic axi-symmetric flow. *J. Atmos. Sci.*, 24, 144-161.

Williams, G.P., 1967b: Thermal convection in a rotating fluid annulus Part 2. Classes of axi-symmetric flow. *J. Atmos. Sci.*, 24, 162-1174.

Williams, G.P., 1972: The field distributions and balances in a baroclinic annukus wave. *Mon. Wether Review.*, 100, 29-41.

Vettin, F., 1884: Experimetelle Darstellung von Luftbewegungen unter dem Einfluss von Temeperatur-Unterschieden und Rotaions-Impulen. *Z. Meteor.*, 1, 227-230, 271-276.

Vettin, F., 1884: Experimetelle Darstellung von Luftbewegungen unter dem Einfluss von Temeperatur-Unterschieden und Rotaions-Impulen. *Z. Meteor.*, 2, 172-183
